# Beyonda Digital Signage

Manage content on all screens  
from a single location

Cloud-based CMS for modern digital  
communication

# Managing content on displays is complicated

- ❌ The content is updated manually
- ❌ No centralized control
- ❌ Various systems and devices
- ❌ Slow response to changes
- ❌ Time-consuming

## One solution for all screens

- ✔ Beyonda is a cloud-based digital signage CMS that makes it easy to manage, schedule, and publish content across a network of displays – from anywhere.

## A complete solution for digital communication

- ✓ cloud platform
- ✓ management of hundreds of displays
- ✓ reliable 24/7 playback
- ✓ access from a PC, smartphone, or tablet
- ✓ video, image, web content

The screenshot displays the BEYONDA dashboard interface. On the left is a navigation sidebar with categories: Dashboard, Devices (sub-items: All Devices, Device Groups), Media (sub-items: All Media, Media Groups), Device programming (sub-items: Playlists, Schedules), and Schedules. The main content area features a 'Dashboard' header with two summary cards: 'Devices' (7) and 'Media' (29). Below the 'Devices' card is a 'Devices Status' donut chart showing 7 devices, with a legend indicating 0 Online and 7 Offline. To the right, a 'Schedules' list contains 15 items, each with a refresh icon and a duration until expiration, such as 'Onevideoschedule replay test playlist s jednim videer' (7 days) and 'Portrait Coca Cola 1' (492 days).

## 3 simple steps

### Upload

content

### Schedule

a viewing

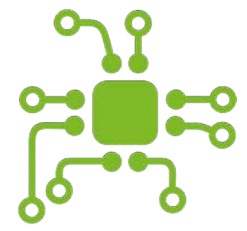

### Publish

anywhere

The content will automatically appear at the right time and in the right place.

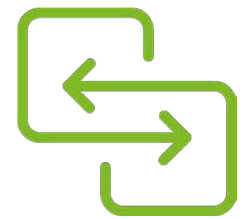

## Why Beyonda

**Centralized manage**  
all content

**Reliability**  
24/7 service
